*Committed to providing
the best, most
affordable innovative
health benefits and
services for agriculture*

Medical • Pharmacy • Vision • Dental
Life • Telehealth • Mental Health

TRUSTED

Since 1983 we've been providing health benefits to over 3 million agricultural workers through our member-sponsored health plan UABT.

● Affordable Plan Options

Our innovative plan options offer free COBRA administration, nationwide prescription drug program, vision and dental plans.

● Wellness & Prevention

All plans provide access to our six regional Health & Wellness Clinics that offer a full range of acute and episodic services from health coaching to nutritional counseling and disease management.

● Network Options

Our plans leverage the Blue Shield of California and Blue Shield National Coverage Networks to provide extensive healthcare access. For pharmacy benefits, we partner with Costco Health Solutions, offering zero-cost generics to make medications more affordable. Additionally, we extend health coverage beyond the U.S.-Mexico border through our partnership with SAIN Medical, ensuring first-class healthcare benefits for your workforce, wherever they may be.

SUPPORTIVE

● Mental Health Support

Our members' health and mental well-being are our top priority. We offer several network options for behavioral and mental health, which include Teladoc Health and Spring Health, providing convenient access to licensed therapists and mental health professionals.

These services are designed to support members in managing stress, anxiety, and other mental health challenges faced day-to-day.

BY YOUR SIDE

Simplifying and personalizing our members' healthcare experience is at the helm of our organization. Our exclusive Member Advocate Service guides members through the complex healthcare system. Our Advocates serve as a liaison with healthcare providers, network partners and health related community services all at zero cost to our members.
